SUPPLIER RFP RESPONSE

Enterprise Cloud Customer Service & Case Management Platform

BrightPath Tech

Fictional proposal for AI evaluation practice

Procurement reference	BANK-CS-2026-01
Proposal date	12 October 2026
Three-year stated total	€315,000
Implementation target	12 weeks
Supplier profile	Lowest price and fast timeline; weak compliance detail and limited experience.

Important data note

All company names, prices, dates, references, certifications, service levels and claims are invented. This PDF is synthetic training data, not a real supplier offer.

1. Executive Summary and Understanding

BrightPath Tech understands that the fictional bank requires a secure, supportable customer service and case management platform integrated with existing banking applications. The bank values reliable operations, clear costs, implementation controls, privacy, and traceable service commitments.

Lowest price and fast timeline; weak compliance detail and limited experience.

2. Proposed Solution and Technical Approach

Offers configurable cloud case management with standard REST endpoints and a web agent console. Claims common integrations can be delivered quickly but provides no API specification, throughput benchmark or detailed high-availability topology. Custom integration design is excluded from fixed scope.

Integration due diligence

Confirm API coverage, authentication, rate limits, error handling, event delivery, monitoring, non-production access, data mapping, ownership of custom adapters and performance assumptions before award.

3. Implementation Plan

Twelve-week target: kickoff, configuration, UAT and launch. Task dependencies, migration rehearsal and named roles are limited. Assumes the bank supplies clean data and business owners respond within two days.

Governance controls to confirm

Validate weekly status reporting, RAID and decision logs, change control, test entry/exit criteria, operational readiness, rollback rehearsal, reconciliation and business acceptance. Confirm which activities are included in the fixed fee.

4. Commercial Proposal

Cost component	Three-year amount
Subscription / platform	Included in stated total
Implementation	Included in stated total
Migration	Included in stated total
Support	Included in stated total
Stated total	€315,000

Three-year total €315,000: subscription €180,000; implementation €95,000; migration €10,000; support €30,000. Lowest bid. Annual increases, storage limits, API overage and sandbox inclusion are unclear.

Commercial assumptions and exclusions

Normalize agent count, environments, API/storage limits, migration volumes, renewal uplifts, taxes, third-party costs, optional modules, support coverage and change-request rates before comparing bids. The stated total is synthetic and needs scope normalization.

5. Security, Privacy and Compliance

Mentions encryption, MFA and access roles but gives no cipher details, audit-retention period, independent certification, penetration-test summary, RTO/RPO or incident notification SLA. Data residency is described only as regional.

Evidence checklist

Request evidence for identity integration, least privilege, encryption/key management, audit retention, vulnerability remediation, penetration testing, breach notification, data residency, subprocessors, deletion at termination, backups and disaster recovery.

6. Support, Service Levels and Experience

Business-hours email support, target response within one business day. 24x7 coverage costs extra.

One small retail deployment is described. No regulated banking reference or named contact is supplied.

7. Risks, Dependencies and Open Questions

• Incomplete security evidence

• Unclear integration scope and overage pricing

• Limited financial-services references

• Business-hours support may be insufficient

Clarification questions

1. Which requirements are included in the price, and which are optional or change requests?

2. Can you provide documentary evidence for security, service levels and references?

3. What are the precise RTO/RPO, residency, incident notification and deletion commitments?

4. Which assumptions could affect cost, integration effort, delivery date or support quality?

End of fictional supplier response. Intentionally varied evidence quality and omissions support testing extraction, validation, benchmarking and ranking.
