SUPPLIER RFP RESPONSE

Enterprise Cloud Customer Service & Case Management Platform

DeltaPeak Software

Fictional proposal for AI evaluation practice

Procurement reference	BANK-CS-2026-01
Proposal date	12 October 2026
Three-year stated total	€365,000
Implementation target	16 weeks
Supplier profile	Competitive pricing and capable APIs; limited support coverage and uneven evidence.

Important data note

All company names, prices, dates, references, certifications, service levels and claims are invented. This PDF is synthetic training data, not a real supplier offer.

1. Executive Summary and Understanding

DeltaPeak Software understands that the fictional bank requires a secure, supportable customer service and case management platform integrated with existing banking applications. The bank values reliable operations, clear costs, implementation controls, privacy, and traceable service commitments.

Competitive pricing and capable APIs; limited support coverage and uneven evidence.

2. Proposed Solution and Technical Approach

Provides REST APIs, webhooks, workflow rules, API documentation and sandbox. Horizontal scaling is described, but peak-load evidence and event replay after outage are not explained.

Integration due diligence

Confirm API coverage, authentication, rate limits, error handling, event delivery, monitoring, non-production access, data mapping, ownership of custom adapters and performance assumptions before award.

3. Implementation Plan

Sixteen weeks with project manager, solution consultant, two developers and shared QA. Includes pilot and UAT. Migration reconciliation lacks measurable acceptance thresholds.

Governance controls to confirm

Validate weekly status reporting, RAID and decision logs, change control, test entry/exit criteria, operational readiness, rollback rehearsal, reconciliation and business acceptance. Confirm which activities are included in the fixed fee.

4. Commercial Proposal

Cost component	Three-year amount
Subscription / platform	Included in stated total
Implementation	Included in stated total
Migration	Included in stated total
Support	Included in stated total
Stated total	€365,000

Three-year total €365,000: subscription €210,000; implementation €110,000; migration €15,000; standard support €30,000. Premium support and performance testing optional. Base license covers 400 agents, below bank's planning estimate of 500.

Commercial assumptions and exclusions

Normalize agent count, environments, API/storage limits, migration volumes, renewal uplifts, taxes, third-party costs, optional modules, support coverage and change-request rates before comparing bids. The stated total is synthetic and needs scope normalization.

5. Security, Privacy and Compliance

States encryption, MFA, role-based permissions and annual security review. No certification evidence attached. Audit retention, incident notification and subcontractor list are incomplete.

Evidence checklist

Request evidence for identity integration, least privilege, encryption/key management, audit retention, vulnerability remediation, penetration testing, breach notification, data residency, subprocessors, deletion at termination, backups and disaster recovery.

6. Support, Service Levels and Experience

Weekday support 08:00–18:00 CET; P1 acknowledgement two hours. Premium 24x7 support costs extra.

One regional financial-services reference and two non-regulated enterprise projects; no independent verification.

7. Risks, Dependencies and Open Questions

- Only 400 agents included
- 24x7 support costs extra
- Performance and event replay evidence limited
- Compliance documentation incomplete

Clarification questions

1. Which requirements are included in the price, and which are optional or change requests?
2. Can you provide documentary evidence for security, service levels and references?
3. What are the precise RTO/RPO, residency, incident notification and deletion commitments?
4. Which assumptions could affect cost, integration effort, delivery date or support quality?

End of fictional supplier response. Intentionally varied evidence quality and omissions support testing extraction, validation, benchmarking and ranking.
