SUPPLIER RFP RESPONSE

Enterprise Cloud Customer Service & Case Management Platform

Evergreen Enterprise

Fictional proposal for AI evaluation practice

Procurement reference	BANK-CS-2026-01
Proposal date	12 October 2026
Three-year stated total	€510,000
Implementation target	28 weeks
Supplier profile	Strong security and support; expensive subscription with conservative delivery.

Important data note

All company names, prices, dates, references, certifications, service levels and claims are invented. This PDF is synthetic training data, not a real supplier offer.

1. Executive Summary and Understanding

Evergreen Enterprise understands that the fictional bank requires a secure, supportable customer service and case management platform integrated with existing banking applications. The bank values reliable operations, clear costs, implementation controls, privacy, and traceable service commitments.

Strong security and support; expensive subscription with conservative delivery.

2. Proposed Solution and Technical Approach

Configurable enterprise SaaS with API gateway, event integrations, SSO federation, extensive audit logging and multi-zone resilience. Offers observability and capacity planning. Some advanced features require premium modules.

Integration due diligence

Confirm API coverage, authentication, rate limits, error handling, event delivery, monitoring, non-production access, data mapping, ownership of custom adapters and performance assumptions before award.

3. Implementation Plan

Twenty-eight-week phased rollout with architecture board reviews, two migration rehearsals, operational readiness assessment and rollback checkpoints. Low-risk approach but requires multiple bank approvals.

Governance controls to confirm

Validate weekly status reporting, RAID and decision logs, change control, test entry/exit criteria, operational readiness, rollback rehearsal, reconciliation and business acceptance. Confirm which activities are included in the fixed fee.

4. Commercial Proposal

Cost component	Three-year amount
Subscription / platform	Included in stated total
Implementation	Included in stated total
Migration	Included in stated total
Support	Included in stated total
Stated total	€510,000

Three-year total €510,000: subscription €330,000; implementation €135,000; migration €15,000; support €30,000. Includes 500 agents and premium audit module. Analytics and non-EU test environments excluded.

Commercial assumptions and exclusions

Normalize agent count, environments, API/storage limits, migration volumes, renewal uplifts, taxes, third-party costs, optional modules, support coverage and change-request rates before comparing bids. The stated total is synthetic and needs scope normalization.

5. Security, Privacy and Compliance

Claims ISO 27001, annual penetration tests, centralized key management, encryption, SSO, least privilege, security event export and breach notification process. Proposes RTO 2 hours/RPO 30 minutes. Full audit report under NDA.

Evidence checklist

Request evidence for identity integration, least privilege, encryption/key management, audit retention, vulnerability remediation, penetration testing, breach notification, data residency, subprocessors, deletion at termination, backups and disaster recovery.

6. Support, Service Levels and Experience

24x7 global support, 15-minute P1 acknowledgement, technical account manager and quarterly resilience reviews.

Three large enterprise references, including one regulated financial environment.

7. Risks, Dependencies and Open Questions

• Highest total cost

• Longest delivery schedule

• Some analytics require additional modules

Clarification questions

1. Which requirements are included in the price, and which are optional or change requests?

2. Can you provide documentary evidence for security, service levels and references?

3. What are the precise RTO/RPO, residency, incident notification and deletion commitments?

4. Which assumptions could affect cost, integration effort, delivery date or support quality?

End of fictional supplier response. Intentionally varied evidence quality and omissions support testing extraction, validation, benchmarking and ranking.
