SUPPLIER RFP RESPONSE

Enterprise Cloud Customer Service & Case Management Platform

Fjordline Technology

Fictional proposal for AI evaluation practice

Procurement reference	BANK-CS-2026-01
Proposal date	12 October 2026
Three-year stated total	€385,000
Implementation target	17 weeks
Supplier profile	Modern integration architecture and good value; limited named references.

Important data note

All company names, prices, dates, references, certifications, service levels and claims are invented. This PDF is synthetic training data, not a real supplier offer.

1. Executive Summary and Understanding

Fjordline Technology understands that the fictional bank requires a secure, supportable customer service and case management platform integrated with existing banking applications. The bank values reliable operations, clear costs, implementation controls, privacy, and traceable service commitments.

Modern integration architecture and good value; limited named references.

2. Proposed Solution and Technical Approach

API-first architecture, event-driven integration, OpenAPI specifications, webhook signing and retry handling. Supports containerized integration components. Production-scale performance evidence and product roadmap are brief.

Integration due diligence

Confirm API coverage, authentication, rate limits, error handling, event delivery, monitoring, non-production access, data mapping, ownership of custom adapters and performance assumptions before award.

3. Implementation Plan

Seventeen weeks with discovery, configuration, API integration, migration, UAT and launch. Includes automated contract tests and rollback plan. Several specialists are shared across customers.

Governance controls to confirm

Validate weekly status reporting, RAID and decision logs, change control, test entry/exit criteria, operational readiness, rollback rehearsal, reconciliation and business acceptance. Confirm which activities are included in the fixed fee.

4. Commercial Proposal

Cost component	Three-year amount
Subscription / platform	Included in stated total
Implementation	Included in stated total
Migration	Included in stated total
Support	Included in stated total
Stated total	€385,000

Three-year total €385,000: subscription €225,000; implementation €115,000; migration €15,000; support €30,000. Includes 500 agents and standard API volume. High-volume events and premium reporting may cost extra.

Commercial assumptions and exclusions

Normalize agent count, environments, API/storage limits, migration volumes, renewal uplifts, taxes, third-party costs, optional modules, support coverage and change-request rates before comparing bids. The stated total is synthetic and needs scope normalization.

5. Security, Privacy and Compliance

TLS, encryption at rest, SSO, RBAC, webhook signing, audit export and vulnerability scanning. Claims alignment with ISO 27001 controls but not certification. EU residency available. Proposes RTO 8 hours/RPO 4 hours.

Evidence checklist

Request evidence for identity integration, least privilege, encryption/key management, audit retention, vulnerability remediation, penetration testing, breach notification, data residency, subprocessors, deletion at termination, backups and disaster recovery.

6. Support, Service Levels and Experience

24x7 incident portal; P1 acknowledgement 30 minutes; on-call engineer escalation. No named service manager.

Two anonymized mid-market deployments; named reference calls unavailable until shortlist.

7. Risks, Dependencies and Open Questions

• Few named regulated-sector references

• RTO/RPO weaker than some bids

• Event usage and reporting overages need clarification

Clarification questions

1. Which requirements are included in the price, and which are optional or change requests?

2. Can you provide documentary evidence for security, service levels and references?

3. What are the precise RTO/RPO, residency, incident notification and deletion commitments?

4. Which assumptions could affect cost, integration effort, delivery date or support quality?

End of fictional supplier response. Intentionally varied evidence quality and omissions support testing extraction, validation, benchmarking and ranking.
