SUPPLIER RFP RESPONSE

Enterprise Cloud Customer Service & Case Management Platform

HarborLight Systems

Fictional proposal for AI evaluation practice

Procurement reference	BANK-CS-2026-01
Proposal date	12 October 2026
Three-year stated total	€350,000
Implementation target	14 weeks
Supplier profile	Low-to-mid price with strong usability; incomplete resilience and migration detail.

Important data note

All company names, prices, dates, references, certifications, service levels and claims are invented. This PDF is synthetic training data, not a real supplier offer.

1. Executive Summary and Understanding

HarborLight Systems understands that the fictional bank requires a secure, supportable customer service and case management platform integrated with existing banking applications. The bank values reliable operations, clear costs, implementation controls, privacy, and traceable service commitments.

Low-to-mid price with strong usability; incomplete resilience and migration detail.

2. Proposed Solution and Technical Approach

Intuitive case-management UI, configurable workflows, REST APIs and dashboard reporting. Emphasizes agent productivity but gives limited details on integration observability, throttling, failover and version compatibility.

Integration due diligence

Confirm API coverage, authentication, rate limits, error handling, event delivery, monitoring, non-production access, data mapping, ownership of custom adapters and performance assumptions before award.

3. Implementation Plan

Fourteen-week rollout using configuration templates and remote workshops. Includes training and pilot. Migration is summarized briefly without reconciliation plan or quantified rollback threshold.

Governance controls to confirm

Validate weekly status reporting, RAID and decision logs, change control, test entry/exit criteria, operational readiness, rollback rehearsal, reconciliation and business acceptance. Confirm which activities are included in the fixed fee.

4. Commercial Proposal

Cost component	Three-year amount
Subscription / platform	Included in stated total
Implementation	Included in stated total
Migration	Included in stated total
Support	Included in stated total
Stated total	€350,000

Three-year total €350,000: subscription €205,000; implementation €95,000; migration €15,000; support €35,000. Includes 500 agents. Data export, premium analytics and extended-hours support may incur extra charges.

Commercial assumptions and exclusions

Normalize agent count, environments, API/storage limits, migration volumes, renewal uplifts, taxes, third-party costs, optional modules, support coverage and change-request rates before comparing bids. The stated total is synthetic and needs scope normalization.

5. Security, Privacy and Compliance

Mentions TLS, encryption at rest, MFA and role-based permissions. No independent certification, penetration-test summary, formal RTO/RPO, data residency commitment or detailed incident SLA.

Evidence checklist

Request evidence for identity integration, least privilege, encryption/key management, audit retention, vulnerability remediation, penetration testing, breach notification, data residency, subprocessors, deletion at termination, backups and disaster recovery.

6. Support, Service Levels and Experience

Extended-hours support with four-hour P1 acknowledgement; 24x7 costs extra.

Two small-to-medium enterprise customers; neither is a bank. No measurable service-level outcomes supplied.

7. Risks, Dependencies and Open Questions

• DR not quantified

• Migration controls need detail

• 24x7 support costs extra

• Security evidence incomplete

Clarification questions

1. Which requirements are included in the price, and which are optional or change requests?

2. Can you provide documentary evidence for security, service levels and references?

3. What are the precise RTO/RPO, residency, incident notification and deletion commitments?

4. Which assumptions could affect cost, integration effort, delivery date or support quality?

End of fictional supplier response. Intentionally varied evidence quality and omissions support testing extraction, validation, benchmarking and ranking.
