SUPPLIER RFP RESPONSE

Enterprise Cloud Customer Service & Case Management Platform

NexaWorks

Fictional proposal for AI evaluation practice

Procurement reference	BANK-CS-2026-01
Proposal date	12 October 2026
Three-year stated total	€410,000
Implementation target	20 weeks
Supplier profile	Balanced proposal; strongest implementation plan and support model.

Important data note

All company names, prices, dates, references, certifications, service levels and claims are invented. This PDF is synthetic training data, not a real supplier offer.

1. Executive Summary and Understanding

NexaWorks understands that the fictional bank requires a secure, supportable customer service and case management platform integrated with existing banking applications. The bank values reliable operations, clear costs, implementation controls, privacy, and traceable service commitments.

Balanced proposal; strongest implementation plan and support model.

2. Proposed Solution and Technical Approach

Proposes SaaS with documented REST APIs, webhook events, integration gateway, idempotency controls, retry queues and observability dashboards. Includes separate environments, capacity assumptions and staged integration tests. Core-banking adapter details depend on two-week discovery.

Integration due diligence

Confirm API coverage, authentication, rate limits, error handling, event delivery, monitoring, non-production access, data mapping, ownership of custom adapters and performance assumptions before award.

3. Implementation Plan

Twenty weeks: discovery (2), design (3), configuration (4), integration (5), migration rehearsal and testing (4), go-live (1), hypercare (1). Includes RACI, weekly RAID review, change control, reconciliation, rollback rehearsal and business sign-off criteria.

Governance controls to confirm

Validate weekly status reporting, RAID and decision logs, change control, test entry/exit criteria, operational readiness, rollback rehearsal, reconciliation and business acceptance. Confirm which activities are included in the fixed fee.

4. Commercial Proposal

Cost component	Three-year amount
Subscription / platform	Included in stated total
Implementation	Included in stated total
Migration	Included in stated total
Support	Included in stated total
Stated total	€410,000

Three-year total €410,000: subscription €240,000; implementation €120,000; migration €20,000; premium support €30,000. Includes 500 agents, two non-production environments, standard API usage and 1 TB migration. Renewal uplift capped at 3% during initial term.

Commercial assumptions and exclusions

Normalize agent count, environments, API/storage limits, migration volumes, renewal uplifts, taxes, third-party costs, optional modules, support coverage and change-request rates before comparing bids. The stated total is synthetic and needs scope normalization.

5. Security, Privacy and Compliance

TLS 1.2+, AES-256, OIDC/SAML SSO, least-privilege RBAC, configurable retention, audit export, vulnerability management and incident response. Claims ISO 27001 and provides penetration-test summary. Proposes RTO 4 hours/RPO 1 hour, subject to validation.

Evidence checklist

Request evidence for identity integration, least privilege, encryption/key management, audit retention, vulnerability remediation, penetration testing, breach notification, data residency, subprocessors, deletion at termination, backups and disaster recovery.

6. Support, Service Levels and Experience

24x7 P1/P2 support, 15-minute P1 acknowledgement, 4-hour workaround target, named customer success manager and monthly reviews.

Two reference organizations are offered subject to permission, including a regulated lender and insurer.

7. Risks, Dependencies and Open Questions

• Adapter mapping depends on discovery

• RTO/RPO must be validated

• Migration above 1 TB separately priced

Clarification questions

1. Which requirements are included in the price, and which are optional or change requests?

2. Can you provide documentary evidence for security, service levels and references?

3. What are the precise RTO/RPO, residency, incident notification and deletion commitments?

4. Which assumptions could affect cost, integration effort, delivery date or support quality?

End of fictional supplier response. Intentionally varied evidence quality and omissions support testing extraction, validation, benchmarking and ranking.
